

Water scarcity is a severe problem around the world affecting more than 4 billion people. This means that many people do not have access to enough water for domestic use. In many parts of the world including in India, the available water is not safe for human consumption. There are many challenges, including lack of public awareness, poor policies, and weak enforcement. A concerted effort by all stakeholders such as government departments, academia, the private sector, and civil society is essential to tackle this problem.

Peter Thomson

Peter Thomson works as Senior Director (Strategic Initiatives) with the Centre for Affordable Water and Sanitation Technology (CAWST). Peter has over 25 years' experience working in water, sanitation and hygiene in both the emergency aid and development sectors. He has a Diploma in Construction and a Master of Science in Community Water Supply from Cranfield University, UK.

Suneel Rajavaram

Suneel Rajavaram is a Senior Global WASH Advisor with the Centre for Affordable Water and Sanitation Technology (CAWST). Suneel has 30 years of experience in irrigation, water, sanitation and hygiene. He possesses a master's degree in water resources management from Gujarat University, India, and a Post Graduate Certificate in international project management from Humber College, Toronto.

SAVE WATER...SAVE LIFE...
